Midway Milestone Presentation

Value Proposition

Do activities you love with people you love.

Problem

- People want to do various activities they love, but do not always have friends available to join them
 - People want to meet new people but do not have an easy way of doing so
-

Solution

- A forum for posting activities that others can join
 - Allows people with similar interests to connect
-

Overview

- Heuristic Evaluation Results
 - Revised Design
 - Prototype Implementation Update
 - Live Demo
-

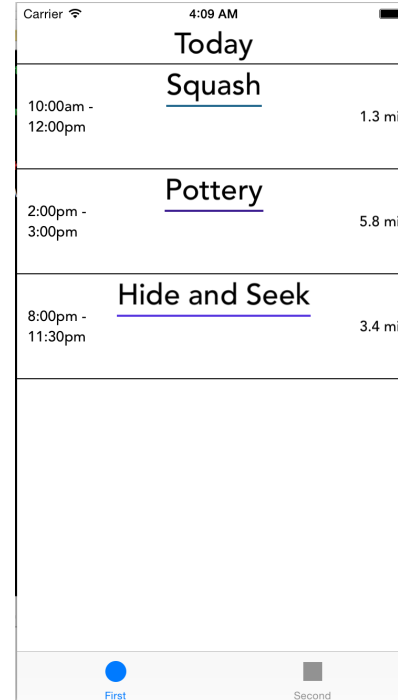

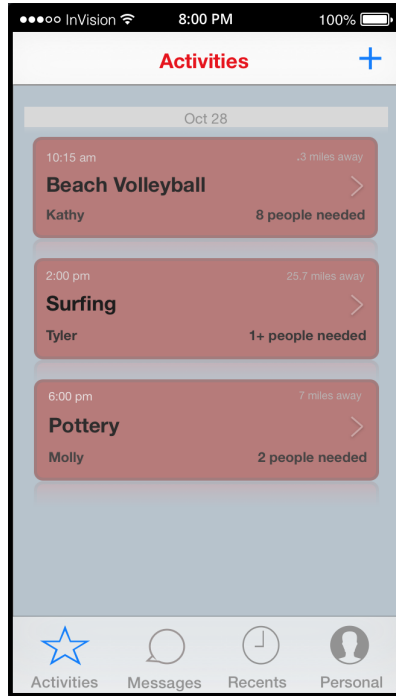

Heuristic Evaluations

- Mostly overlooked details
 - Efficiency of Use Issues
 - Filtering activities
 - Showing a large list of activities
 - Messaging function
-

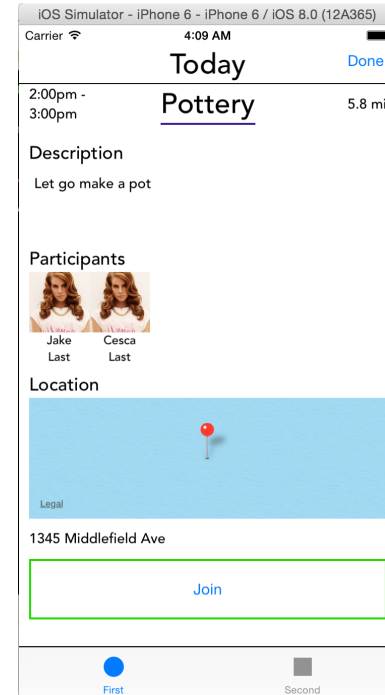

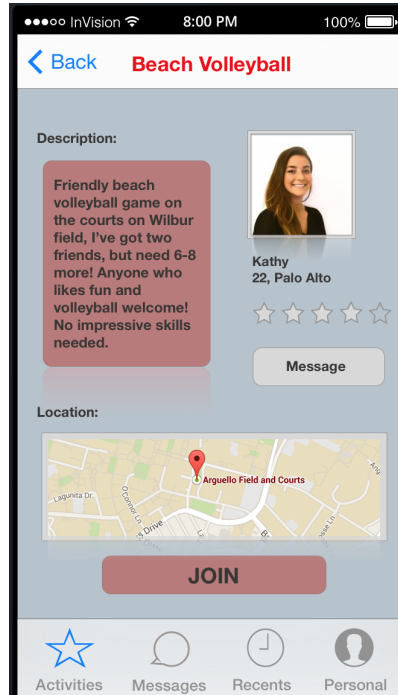

Heuristic Evaluations Cont.

- Visibility of Status Issues
 - Activity posting visibility
 - Number of people currently joined in an activity
 - Consistency Issues
 - Number of people needed for an activity
 - Stars rating system
-

Revised Design: Eliminating Info

Revised Design: Animation

Prototype Implementation Status

- Tools Being Used
 - XCode
 - Implemented Features
 - Finding activities
 - Seeing details and joining activities
-

Prototype Implementation Status

- Unimplemented Features
 - Creating activities
 - Messaging friends
 - Creating a biography
 - Google maps integration
 - Tracking past activities
-

Prototype Implementation Status

- Wizard of Oz Techniques
 - Database storing activity data
 - Creating a user
 - Messaging functionality

Prototype Implementation Status

- Hard-coded Data
 - Creating/Logging in as a user
 - Previous activities
 - Messaging server with friends

Prototype Implementation Status

- Issues/Questions
 - How functional does the final product have to be?
 - Should we implement all changes suggested in the heuristic evaluation or just focus on the more severe ones?
-

Midway Demo
